ARTIST HIGHLIGHTS

Foreign Air

East coast electro-indie project Foreign Air is an enigmatic duo with an ear for creating soundscapes that embrace the invisible necessities in life. They have toured with acts like Phantogram, Bishop Briggs, Bleachers, Anna Shoemaker and more. They are currently gearing up to release their third studio album "Such That I May Glow" on Nettwerk Music Group.

Mystery Skulls

Mystery Skulls, the electronic, dance, neo-soul and vintage disco-influenced alias of singer/songwriter/producer Luis Dubuc started in 2011. Since then he has released 9 full-length albums. His debut album as Mystery Skulls featured collaborations with Nile Rodgers, Adam Lambert, and Avicii. At the core of his music are lyrics tackling life's highs and lows juxtaposed with backbeats to keep dancing in spite of it all.

ROSE CITY BAND

Rose City Band - sun-kissed timeless country rock whose seemingly effortless momentum carries the joy of its creation without ignoring the darkness pervading our consciousness. Led by guitarist/vocalist Ripley Johnson of Wooden Shjips and Moon Duo, the music of Rose City Band is rooted in his love of private press records of the mid to late 70's. "With Rose City Band, I'm generally trying to make uplifting music, good time music."

Chevy Metal

Chevy Metal is a cover band that focuses on rock classics mixed with deep cuts. It was created in 2002 by Taylor Hawkins as a side project from his primary band, Foo Fighters. They spent the first ten years playing dive bars and small clubs, until their traction led them to play arenas, festivals, and stadiums. When Taylor passed, his son, Shane Hawkins, decided to take his father's place as their drummer, ensuring his legacy would live on.

"Lights on the Way"
